Flag: Follow up

Thank you so much for your reply.

I have one more thing to ask you about the readme file. I hope you to add the location of the example files into the new readme text file. I realized that the installation file put the example files (net1, net2, net3 and fl data) into %home%\EPANET Projects. Previously, it was installed C:\Program Files (x86)\EPANET2\Examples. Thank you again.

Thanks Hyoung.

I made the necessary updates to the components.zip and epanet2w.zip files (contained in en2source.zip) archived on my OneDrive in case you need them.

I have one more update to make on EPANET 2.2 before I'm done --- fixing the mass balance issue for its water quality module. I should have something ready to test by next week and will send it to you.

Lew

Hi Lew,

I am reporting you that I can successfully compile EPANET2 using Delphi 10 community version.

During the compilation process, I noticed that you spent many hours to change some parts of GUI source code used for chart and colors components those are not revealed externally. I also noticed tiny things were incorrectly included in the source code zip file. Please see the followings.

- Components.zip - Numedit.dcr was not included. I can generate DCR using BRCC32 tool.
- epanet2w.zip
 - Mycurs32.res - was not included in the source code. I borrowed from the previous source code.
 - Dbackdim.dfm - need to be excluded as it is related to SWMM
 - Dbackdim.pas - need to be excluded as it is related to SWMM
 - Dbackdrp.dfm - need to be excluded as it is related to SWMM
 - Dbackdrp.pas - need to be excluded as it is related to SWMM
 - Readme.txt
 - Delphi 10 start version is currently called Delphi 10 community version.
 - Dchart.pas - newly added in this GUI version. need to be added in readme.txt

I learned from Michael that you are working on the engine update for EPANET2.2 and close to release it. If you need another hand for testing and documentation, please let me know about it. I am willing to do it.

Thank you.

I fixed a bug in the GUI's Time Series Plot routine (legends weren't being shown by default on plots with multiple time series). The updated set of files can be found at <https://1drv.ms/f/s!AuBjsJFISJWljymUwfVwuXVl1Tq>.
